Product description

Complementary feed (powder) for male dogs

To promote sperm quality and sex drive in breeding male dogs

Especially in older breeding males, sperm quality decreases naturally - sooner in some and later in others. **ProBreeder Go Boy Go** can then support sperm production and promote the quality of the ejaculate. The ingredients of **ProBreeder Go Boy Go** provide important sources of vitamin B, selenium, and folic acid, among other things, and can have a have a revitalizing effect.

In a scientific study in cattle, it was observed that the roots of Maca seemed to improve sperm quality and quantity to some degree, while mating behavior did not appear to be affected (https://doi.org/10.1016/j.theriogenology.2010.01.028).

Composition: malt germs, brewers' yeast, pumpkin seeds, ginkgo leaves, maca root

Analytical constituents: crude protein 35.1%, crude fat 3.8%, crude fiber 7.2%, crude ash 6.3%

Feeding recommendation: Add 1.5 g/5 kg body weight daily to the feed. 1 tsp. corresponds to ca. 3 g. Start feeding at least 5-7 days before the planned mating, for veteran males also as a 3-week cure 2 x a year.
