ProBreeder Let It Flow 90 g | 90 g

Manufacturer	Pro-Breeder
Product number	630780
Weight	0.09kg
Length	67mm
Width	67mm
Height	89mm

Product description

Complementary feed (powder) for bitches

To promote milk production in mother dogs

Normally, a healthy bitch has enough milk to suckle her puppies from birth. The first 24 hours are particularly critical, as it is only during this period that the foremilk, which contains the colostrum that is so important for the puppies' immune defense, is absorbed through the puppies' intestinal barrier.

But every now and then it happens that the milk does not come in on time, e.g. after a caesarean section. The result is whining puppies, a stressed bitch, and breeders who have to feed replacement milk around the clock. With **ProBreeder Let It Flow** you gently and naturally stimulate milk production.

Composition: fenugreek seeds, wheat germ, fennel seeds, anise seeds

Analytical constituents: crude protein 26.4%, crude fat 8.3%, crude fiber 0.5%, crude ash 3.8%

Feeding recommendation: Add 1 g/5 kg body weight daily to the feed. 1 half tsp. corresponds to ca. 1 g. Capsule filling quantity: ca. 0,5 g. An indication that the feeding quantity is sufficient is that the bitch's breath begins to smell of syrup. If this is the case, the feeding quantity can be gradually reduced. Initially, always put the strongest puppies on first so that the flow of the milk is further stimulated and the weaker puppies then have to exert less energy to drink.
