ToxiVet sorb 50 g | 50 g

Manufacturer	cdVet
Product number	557
Weight	0.05kg
Length	45mm
Width	45mm
Height	68mm

Product description

Complementary feed (powder, capsules, pellets) for dogs and cats

For demand-oriented feeding of metabolically sensitive dogs and cats with toxin-binding and prebiotic properties

ToxiVet sorb contains highly effective ingredients that can help bind toxins while also relieving the liver. It supports the intestines in binding toxins and subsequently eliminating them. This makes it more difficult for harmful substances to enter the organism.

ToxiVet sorb is rich in natural B vitamins, trace elements, and essential amino acids. Mannan-oligosaccharides (MOS) support the intestine’s mucous protective barrier and its non-specific immune system.

Expert tip: For diet-related digestive disorders, **ToxiVet sorb** can also be used in combination with **GutActive** to provide support. However, if **GutActive** is being fed at the same time, the individual products should be fed at different times (e.g., in the morning and in the evening). **ToxiVet sorb** has proven particularly effective as part of an intestinal cleansing regimen using **GutClean** and **GutActive**.
