VeaVet PlasterSpray 100 ml | 100 ml

Manufacturer	VeaVet
Product number	1209
Weight	0.1kg
Length	46mm
Width	46mm
Height	142mm

Product description

Care product (liquid) for animals

Protection of wounds from external influences thanks to breathable protective film with dragon's blood and propolis

Our innovative **VeaVet PlasterSpray** combines the healing properties of dragon's blood - a natural tree resin from the Amazon region - with the antibacterial properties of propolis. This advanced duo provides a fast and effective support for wound healing.

Dragon's blood has been used in traditional medicine for centuries. It accelerates the healing process and forms a natural, breathable protective film over the wound. It promotes cell renewal and can, therefore, support natural wound healing. Propolis is particularly beneficial for stressed and irritated skin, for example after minor skin irritations or slight abrasions.

- *Natural protection:* The spray forms an invisible protective film that breathably envelops the skin surface. This protects the wound from external influences.
- *Rapid wound healing:* Promotes tissue regeneration and ensures rapid healing.
- *Suitable for all breeds:* Whether small or large wounds - our spray is safe and effective for every furry friend.
- *Application:* Thanks to the spray bottle, the product is easy and hygienic to use - with no burning or pain for your pet.
- Perfect for use at home or on the go

Composition: aqua, propane-1,2-diol, dragon's blood, propolis tincture

Application recommendation: Shake before use! Clean the affected area and apply the spray at a distance of ca. 10-15 cm. The spray dries quickly and protects the wound from external influences such as dirt, moisture and germs. Avoid eye contact!
