Product description

Care product for dogs and cats

Gentle sun protection for sensitive four-legged friends

Give your four-legged friend a carefree summer - with natural protection and full freedom of movement!

Sunny days invite you to play and explore outdoors - but just like us humans, our animal companions also need protection from the sun. Dogs and cats with little, light-colored, or no fur are particularly susceptible to the effects of intense UV radiation. **VeaVet Sun Protect** offers a gentle and effective solution to reliably protect sensitive skin areas such as ears, nose, belly, or back.

Composition: jojoba oil, evening primrose oil, zinc oxide 10%, argan oil

Application recommendation: Simply spray a thin layer onto exposed areas of skin before going outdoors and leave to act briefly. Particularly recommended for walks, garden time or trips to the water. Re-spray regularly if necessary. Do not spray directly into the face or eyes.
