Manufacturer	feliTATZ
Product number	3090
Weight	0.1kg
Length	67mm
Width	67mm
Height	89mm

Product description

Complementary feed (powder) for cats

Feeding-related support of the skin metabolism, 100% natural

Animals often suffer from nutrition-related stress on the skin metabolism. However, the skin and fur have very important functions. They serve as a barrier against external influences such as heat, cold, etc.

feliTATZ insektoVet Herbal has been developed precisely for this nutritional situation. The herbs it contains, especially the multitude of natural B vitamins, amino acids, various minerals, and trace elements, nutritionally-related support the skin metabolism and thus contribute to a positive development of the skin milieu and odor. **feliTATZ insektoVet Herbal** can reduce the animal's own odor, so that your cat is no longer perceived by insects and pests as an attractive host that is worth infesting.

Expert tip: feliTATZ insektoVet Herbal can of course be combined with our other ***cdVet*** products such as **feliTATZ Defense Concentrate** and **insektoVet Combi Spray**.

Composition: brewers' yeast, grated coconut, rockrose leaves, catnip herb

Analytical constituents: crude protein 28.7%, crude fat 25.6%, crude fiber 8.6%, crude ash 3.8%

Feeding recommendation: Add 1 g/5 kg body weight to the feed daily. If necessary, the feeding quantity can be doubled. 1 half tsp. corresponds to ca. 1 g.
