Fit-BARF InsectsOil 200 ml | 200 ml

Manufacturer	Fit-BARF®
Product number	4515
Weight	0.182kg
Length	70mm
Width	70mm
Height	95mm

Product description

Feed material (oil) for dogs

Feed supplement for the BARF ration - rich in essential fatty acids

Fit-BARF InsectsOil - a unique source of fat

Our high-quality **Fit-BARF InsectsOil** is derived from the larvae of the black soldier fly (*Hermetia illucens*) and offers an additional source of fat for dogs with specific dietary needs. Since intolerances can affect protein, fat, and carbohydrate metabolism, alternative ingredients such as insects can be a useful addition to the feeding regimen for some animals. Insect protein and the fats derived from it are therefore becoming increasingly important in modern pet nutrition, as these alternative protein and fat sources are particularly well tolerated by many dogs with dietary sensitivities. https://cdvet.de/insektenoel

Fit-BARF InsectsOil is characterized by a good fatty acid profile. Particularly noteworthy is its high lauric acid content, which can help support the natural balance of the skin and gut. In addition, **Fit-BARF InsectsOil** contains valuable fatty acids such as linoleic acid (omega-6) and oleic acid (omega-9), as well as other functional lipids that play an important role in skin metabolism, coat quality, and cell health.

Fit-BARF InsectsOil is highly palatable to our four-legged friends, and the fatty acids it contains are also an excellent source of energy for sporting and working dogs.
