Manufacturer	insektoVet®
Product number	788
Length	60mm
Width	80mm
Height	238mm

Product description

Care product for horses

Odor-improving care oil concentrate for use on the horse and in stables

Natural combination product for covering odors on the horse and improving the room air in the barn. Consequently, it supports appetite behavior in horses. **insektoVet Fly Spray Concentrate** is a `horse deodorant´ which makes your horse unattractive to flies, mosquitos, gnats, and horseflies during the warm season.

Tip of an expert: Proven use in confined spaces: Apply ready-to-use **insektoVet Fly Spray Concentrate** to a resealable bowl / can. Soak a sponge with the solution. The sponge continuously releases the natural scent of the essential oils. In the evening or as needed, the bowl / box can then be closed again, so that an economical application is possible.

Composition: aqua, eucalyptus oil, sage oil, thyme oil, geranium oil, cumin oil, emulsifier

Application recommendation: Shake before use! Mix 10 ml concentrate with 200 ml water in a spray bottle. In extremely problematic situations, the amount of concentrate can be increased. In stables, spraying the stable walls has proven to be effective. Avoid direct contact with eyes and mucous membranes!

WARNING • Contains cineole, (E)-anethole, limonene, pin-2(3)-ene. May cause an allergic skin reaction. Harmful to aquatic life with long lasting effects. Keep out of reach of children. Wear protective gloves/protective clothing/eye protection/face protection. IF ON SKIN: Wash with plenty of water and soap. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Dispose of contents/container to hazardous waste collection point.
