Kieselgur Liquid Powder 2 kg | 2 kg

Manufacturer	
Product number	535
Weight	2kg
Length	200mm
Width	200mm
Height	205mm

Product description

Special product (powder), dry adjuvant – dust-free wet application

100% natural diatoms, very finely ground - highly drying grit for application in stables and household, respectively

Kieselgur consists of the ground skeletons of fossil diatoms, the so-called 'diatoms'. These skeletons consist of silicon oxide. The use of kieselgur as a natural raw material is becoming increasingly important. Its absorptive capacity is used wherever liquid or moisture needs to be bound.

Kieselgur is also approved for use in animal feed in accordance with EU regulations for all animal species. This means that it is extremely safe to use in the immediate vicinity of animal feed.

Kieselgur Liquid Powder is characterized by its good water miscibility and therefore allows dust-free application. Due to its specific, rapid drying, the effectiveness is fully maintained. **Kieselgur Liquid Powder** cannot be overdosed. The quantity applied to the required areas depends on the nature of the material. A light-colored coating should be visible everywhere on the treated areas.
