VeaVet Skin Protection 20 mö | 20 ml

Manufacturer	VeaVet
Product number	1270
Weight	0.02kg
Length	28mm
Width	28mm
Height	102mm

Product description

Care product for animals

Natural care product with ionizing silver for intensive skin care

VeaVet SilverAid Skin Protection contains micronized silver and is designed for natural skin, hoof, and coat care in many mammals. It can be applied directly to the coat, skin, and hooves. It is particularly notable for its excellent skin tolerance.

Specially processed silver particles are combined with high-quality, cold-pressed oils in **VeaVet SilverAid Skin Protection**. The micronized silver particles measure 0.01 mm and, unlike nanoparticles, do not enter the animal's body. Nanosilver particles can have a harmful effect on many cell types in the body. However, the surface effect of the silver particles in **VeaVet SilverAid Skin Protection** is entirely sufficient to provide the skin with long-term protection without burdening the organism. This long-term protection is possible because the micronized silver, due to its special, sponge-like surface, is able to generate new silver ions throughout the day. This results in a continuous renewal of the protective function. The nourishing oils complement this protective function by moisturizing the skin, thereby ensuring the animal's optimal well-being.
