Product description

Complementary feed (liquid) for cats

Nutrition-related support of the self-cleaning mechanism of the bronchi

The mucus-forming ingredients of **feliTATZ Bronchial** protectively cover the affected respiratory tracts and support the body's own defense mechanisms. At the same time, the irritation of the cough is soothed and reduced. In addition, the essential oils contained in the herbs and the pure blossom honey ensure a gentle dissolution of stuck mucus, make it difficult for pathogenic bacteria to settle there, and thus facilitate the natural process of coughing up.

The contained pure honey also stimulates the appetite and provides the cat with energy. **feliTATZ Bronchial** is tolerated by cats of all ages and can be mixed into the food without any problems due to its high acceptance.
