Product description

Care product for horses

For dry, cracked skin - especially for care around the pasterns

Regular skin care is especially important in the back of the pastern area due to the risk of mud fever. If problems are already present, **EquiGreen Skin Balm** should be massaged generously and deeply into the skin. If scabs and crusts have already formed, this process should take a good quarter of an hour per leg. During this process, many scabs will come loose and need to be rubbed off with `gentle force´.
