cdProtect Dog >10 kg, 24 capsules | 24 Kapseln

Manufacturer	cdVet
Product number	1436
Weight	0.0108kg
Length	45mm
Width	45mm
Height	70mm

Product description

Complementary feed (powder, capsules) for dogs

Wild herbs for an intestinal ambience hostile to worms

cdProtect Dog was developed for the special nutritional needs that arise in connection with colonization by worms. The lack of herbal ingredients, such as saponins, bitter substances, and tannins, can make our pets susceptible to excessive colonization by worms. In contrast to their conspecifics living in the wilderness, they often do not have the opportunity to absorb those substances through plants and herbs. However with their wild relatives, precisely these substances lead to avoid an excessive, pathological colonization by worms.

In order to have less often a reason for chemical deworming cures, the animal's intestine should therefore be supported with appropriate herbs that are contained in **cdProtect Dog**. Besides of a balanced diet, you can achieve this by the occasional addition of the complementary feed **cdProtect Dog**, which can compensate for the lack of herbal ingredients, such as saponins, bitter substances and tannins. In addition, many specialists for parasitology recommend checking the colonization by worms of the animal by regularly

monitoring the faeces samples.

Composition: ground wormwood herb, ground cloves, ground black walnut shells

Analytical constituents: crude ash 7.1%, crude protein 8.3%, crude fat 2.5%, crude fiber 20.1%

Feeding recommendation (dogs <15 kg): feed very small dogs (<5 kg) 1 cap., small dogs (5-10 kg) 2 caps., medium-sized dogs (10-15 kg) 3 caps. per day on 3 consecutive days. Then a 7-day break, then feed the specified amounts again for 3 consecutive days.
Feeding should be repeated every 3 months.

Feeding recommendation (dogs >10 kg): feed small dogs (10-20 kg) 2 cap., medium-sized dogs (20-25 kg) 3 caps., tall dogs (>25 kg) 4 caps. per day on 3 consecutive days. Then a 7-day break, then feed the specified amounts again for 3 consecutive days.
Feeding should be repeated every 3 months.
