MicroMineral Dog & Cat 1 kg | 1 kg

Manufacturer	cdVet
Product number	22
Weight	1kg
Length	99mm
Width	99mm
Height	222mm

Product description

MicroMineral contains 100% purely natural ingredients, which are rich in natural, easily available micronutrients, such as minerals, trace elements, vitamins, etc. Due to their plant origin, the detoxification organs are not further burdened, which allows an optimal, natural micronutrient supply of calcium, magnesium, a whole complex of vital trace elements and alginates thus.

Particularly when feeding ready-made feed, a deficiency situation quickly arises because many substances are damaged, modified, or destroyed by industrial and thermal processing. Synthetic substances cannot completely eliminate this deficiency. Therefore, cdVet MicroMineral should not be missing in any diet. As an addition to dry food, canned meat and also in fresh meat feeding, for natural mineralization and vitamin protection.

Special attention should be paid to an optimal micronutrient supply:

in growth
in fur changing
in training and competition use

in breeding
at stress
at problems with fur and skin
at older animals
at metabolism problems and allergies

Possible consequences of nutrient deficiency:

problems with the fur change
flaky skin
dull fur
developmental delay
degeneration of bones and joints
weakened immune system
early signs of aging
susceptibility to stress
birth difficulties
