CBD Oil 20 ml | 20 ml

Manufacturer	cdVet
Product number	1240
Weight	0.019kg
Length	28mm
Width	28mm
Height	100mm

Product description

CBD is the abbreviation for cannabidiol, one of the many ingredients in the hemp plant Cannabis sativa. In contrast to the hemp component THC (=tetrahydrocannabinol), CBD has no intoxicating (psychoactive) effects. CBD is unique because of its interaction in the organism.

The process of extracting the ingredient CBD from the hemp plant with the help of chemicals is customary in trade. The extracted CBD was then marketed as animal feed. However, this type of production is not permitted for animal feed. Due to the lack of marketability, many CBD products have meanwhile been taken from the market. cdVet therefore did not have any CBD products in its range so far. cdVet CBD Oil is not an extract obtained with chemical additives, but a legally compliant, purely natural, cold-pressed CBD oil with a high CBD content. Thus the CBD Oil from cdVet is marketable as a complementary feed for animals and can be fed without hesitation to animals that do not have an MDR1 gene defect.

The special cdVet cold pressing process ensures concentrated, purely naturally obtained CBD oils, which also contain the full spectrum of plant substances, consisting of terpenes, flavonoids, phenols, omega-3 and -6 fatty acids, minerals, and vitamin E. The psychoactive THC is almost completely eliminated and is of course below the limit value of 0.2% THC specified by the EU.

Dogs with MDR1 gene defect: There are no reliable studies on the tolerability of CBD products regarding dogs with MDR1 gene defect. We recommend the following alternative cdVet products for dogs with MDR1 gene defect:
Musculoskeletal system: ArthroGreen Classic, ArthroGreen plus, et al.
Stress: Nerves Food, Calma, et al.
