Product description

Bulging udder, friction, moisture and air seal can form the ideal conditions for strong microbial contamination in between legs- and intermediate udder area. Through this state between legs- or intermediate udder eczema are often caused or favored. Thus, in affected cows special health and care is needed.

Interim Udder Spray is a natural care product for particularly intensive and effective skin care in between legs- and intermidiate udder area.

- Reduction of friction susceptibility of the skin surface
- intermediate udder spray has hygiene -improving long-term effect between the areas of skin, even with severe microbial contamination
- Highly breathable
