GutActive Dog & Cat 1 L | 1 l

Manufacturer	
Product number	456
Weight	1.01kg
Length	88mm
Width	88mm
Height	230mm

Product description

For the production of GutActive, wild and spice plants are fermented together in a natural process. During this fermentation, the probiotic microorganisms multiply, producing the substances that are so valuable to us, such as lactic acid, antioxidants, enzymes and vitamins. This special mixture of valuable lactic acid bacteria and co., can regulate the pH in the digestive tract, the development of pathogenic bacteria is naturally reduced. This makes GutActive to a holistic product in which all components complement and work together.
The fermented herbs in the GutActive support the balance of the intestinal flora and the entire microbiological situation. This promotes physiological digestion and stimulates the natural immune system.

- Milk-free and therefore very well suited for milk intolerance.
- Sugar-free and therefore also suitable for diabetics. During the fermentation process, the lactic acid bacteria multiply by breaking down the sugars and turning them into lactic and acetic acid. Only when the sugars are completely degraded, the fermentation process is complete.

- Contains no alcohol.
- The herbs contained are no longer available in the original form after fermentation and are thus compatible homeopathy and usually easily tolerated.
