Product description

Minerals, trace elements, and vitamins are indispensable building blocks of the body. Especially the calcium intake plays a major role during the growth period of young dogs in raw feeding. Covering the requirement of calcium can only be achieved by feeding sufficient bone or adding calcium. Not every dog can or wants to eat bones. Due to the high proportion of calcium, herbaBARF Junior offers a well utilizable animal calcium source for daily feeding. supports the development of tendons, ligaments, and cartilage promotes bone development suitable for puppies from 8 weeks on and young dogs up to 2 years of age prebiotic support of digestion and intestine regulation of the acid-base balance
