ArthroGreen Horse 700 g | 700 g

Manufacturer	ArthroGreen®
Product number	1280
Weight	0.7kg
Length	99mm
Width	99mm
Height	222mm

Product description

Complementary feed (powder) for horses

For the demand-oriented feeding of animals sensitive to joints – special supply of joints, muscles, tendons with New Zealand greenshell mussel (non-defatted mussel meat)

When you think of natural joint support, the New Zealand greenshell mussel comes to mind almost immediately. It has been used for centuries and valued as a natural support for joints. Its rich composition is also very popular in the equine sector and is used by many horse owners, because the greenshell mussel generally supports the cartilage, ligaments, and joints in the horse's body. Especially during periods of stress, feeding with greenshell mussel can help to strengthen healthy joints and make them less susceptible to degenerative processes.

As many horses do not like the fishy taste of greenshell mussels at first, **ArthroGreen Horse** has optimized the tried-and-tested basis of ArthroGreen with high-quality plant ingredients that support the metabolism and joints and are tailored to the nutritional requirements of horses and ponies, and enriched it with ingredients that increase acceptance. Those are also characterized by their positive properties for regulating the acid-base balance, which can often play a decisive role in impaired joint function.

Expert tip: ArthroGreen Horse is suitable for accompanying therapy. **EquiGreen EquiMint** is recommended for accompanying external care. To ensure an adequate supply of micronutrients and minerals, it is also advisable to feed **EquiGreen HuminoMineral**.

Composition: ginkgo leaves, New Zealand greenshell mussel powder (freeze-dried) 15%, green oats, rose hip husks, devil's claw root, stinging nettle herb, field horsetail herb, sea buckthorn berries, spirulina, willow bark, curcuma roots

Analytical constituents: crude protein 19.6%, crude fat 5.3%, crude fiber 11.4%, crude ash 8.5%, calcium 1.46%,

phosphorus 0.38%, sodium 0.28%

Feeding recommendation: Add daily ca. 5 g/100 kg body weight to the feed. If required, the feeding amount can be increased. 1 tbsp. corresponds to ca. 5 g.

Contains fishmeal - shall not be fed to ruminants.
