Fit-BARF Safe-Complete 25 kg | 25 kg

Manufacturer	Fit-BARF®
Product number	1253
Weight	25kg
Length	430mm
Width	200mm
Height	800mm

Product description

Complementary feed (powder) for dogs

Natural complementary feed for protection against coarse feeding deficiencies

Many dog owners, feeding their dogs with raw meat, assume that with a food ration based on the prey animal, the nutritional needs of their dogs are optimally covered. Nowadays, however, the ingredients used mostly come from industrial animal husbandry, which are often fed very one-sided and with regard to weight and growth and not to an optimal nutrient supply. In the past, when farm animals were kept on species- and herb-rich pastures and received feed mostly from their own cultivation, their diet was much more varied and above all rich in secondary plant substances. Nowadays, the latter are almost completely absent from farm animal feed for the reasons mentioned above. Our dogs and cats need these secondary plant substances, which they originally found in the bodies of their prey, in order to remain permanently healthy and efficient.

Fit-BARF Safe-Complete was developed for this purpose. Its broad spectrum of micronutrient-rich fruits and vegetables, rounded off with herbs, algae, and other high-quality natural ingredients, compensates for the lack of secondary plant substances and other natural micronutrients in feeds of animal origin and thus enables a species-appropriate healthy nutrition. The calcium content of **Fit-BARF Safe-Complete** is very moderate and therefore it is especially suitable as a supplement in bone feeding, as well as a safeguard when feeding larger portions of leftovers.

Composition: maerl, grass, herbs, legume plants, linseed, apple pomace, parsnip (ground), aronia pomace (powder), black currant pomace, eggshell powder, peat, sunflower seed expeller, malt rootlets, carrot pomace, brewers’ yeast, seaweed meal, grape pips meal, brewers' yeast cell walls (MOS), celery tuber (ground), moringa (powder)

Analytical constituents: crude protein 11.0%, crude fat 6.4%, crude fiber 13.2%, crude ash 24.7%, ash insoluble in HCl 2.6%, calcium 8.46%, phosphorus 0.29%, sodium 0.14%

Feeding recommendation: Add 5 g/10 kg body weight daily to the feed. 1 tsp. corresponds to approx. 3 g.
