Fit-BARF Greenshell Mussel 100 g | 100 g

Manufacturer	Fit-BARF
Product number	4307
Weight	0.1kg
Length	67mm
Width	67mm
Height	89mm

Product description

Feed material (powder) for dogs and cats

Natural source for taurine and glycosaminoglycans – for the demand-oriented provision at feeding with raw meat

The naturally very high taurine content of the greenshell mussel is a very pleasing aspect for cat owners. Cats in particular depend on a sufficient supply of this organic acid in their food, as they cannot produce taurine themselves and lose a large part of it through their excretions. Taurine is essential for cats. A deficiency can lead to severe impairments and physical damage.

Fit-BARF Greenshell Mussel consists of New Zealand greenshell mussel powder (Perna canaliculus, freeze-dried, non-defatted mussel meat). In addition, the greenshell mussel provides important components of the body's own mucous membrane as a building block and can thus have a supportive effect on the functionality and elasticity of the urinary bladder and all other mucous membranes. Occasionally fed, the trace elements and vitamins contained in the greenshell mussel can have a positive effect on vitality, metabolism, nutritional imbalances and on stressed skin.

Expert tip: Does your dog suffer from joint problems? Then take a look at **ArthroGreen Classic**. The herbal composition, proven for years, supports your beloved four-legged friend on his daily tours.
Growing puppy? Here **ArthroGreen Junior** offers the nutrients for a safe step into the big, wide world.

Composition: New Zealand greenshell mussel powder (*Perna canaliculus*, freeze-dried, non-defatted mussel meat) 100%

Analytical constituents: crude protein 54,1%, crude fat 10,3%

Feeding recommendation: Add daily to the feed. Cats: 0.5 g/5 kg body weight. Dogs: 0.5 g/10 kg body weight. 1 half tsp. corresponds to ca. 1.5 g.
