Product description

MastitiVet Clean is a care product without petrochemical ingredients, surfactants, colorants, fragrances, and preservatives, and is free of fat and oil. In a special electrolysis process, a highly effective care and hygiene product is produced by using salt, water, and electricity. After its effect, the agent decomposes back into its original ingredients, water and salt. MastitiVet Clean has been developed for the care in the udder and vaginal area to reduce biological burdens. If something gets into the teat canal during application, this is harmless. MastitiVet Clean can also be used for care in the area of afterbirth, as well as for external cleaning and care in the vaginal area. for skin care in the udder and vaginal area to reduce biological burdens dermatologically tested no by-product formation and residues, but disintegration into its natural source materials (water and salt) after the cleaning process does not contain inhibitors ready-to-use application solution, easy handling No waiting times !
