| **Weight** | 0.0915kg |
| **Length** | 46mm |
| **Width** | 46mm |
| **Height** | 152mm |

## Product description

At thrush, a rotting-like dissolution of the hoof frog occurs. It is caused by lack of cleanliness and care of the hooves, especially by standing in the damp manure.

In order to protect horses from a new disease, a clean stable, as well as dry litter (EquiGreen HuminoVet granulate / powder) should be self-evident.
