Fit-BARF Organic Spirulina 36 g | 36 g

Manufacturer	Fit-BARF®
Product number	4320
Weight	0.036kg
Length	45mm
Width	45mm
Height	70mm

Product description

Spirulina, which in the true sense does not belong to the algae but to the blue bacteria, is not very impressive at just about 0.3 mm in size. But on closer inspection, it turns out to be a real powerhouse. Since its cells have no nucleus and its cell envelope is very soft, the nutrients it contains can be absorbed excellently through the intestine. When metabolized, it can have a positive influence on alkaline formation and thus on the acid balance of the stomach.

It consists of almost 70% highly digestible protein and contains a variety of vitamins, trace elements, minerals, chlorophyll, and amino acids. This makes it also suitable as a supplement for increased activity requirements. The contained blue pigment phycocyanin can have a supporting effect on the liver and kidney circulation and intercept free hydroxyl radicals. Since spirulina is not a marine algae, its iodine content is rather low.
