CBD Sticks 300 g | 300 g

Manufacturer	cdVet
Product number	1195
Weight	0.3kg
Length	98mm
Width	98mm
Height	98mm

Product description

Complementary feed (sticks) for dogs and horses

Tasty sticks from CBD-containing press expeller

CBD Sticks are extracted from the leaves of the hemp plant using the special ***cdVet*** cold pressing process. CBD is the abbreviation for cannabidiol, one of the many ingredients in the hemp plant *Cannabis sativa*. In contrast to the hemp component THC (=tetrahydrocannabinol), CBD has no intoxicating (psychoactive) effects.

The process of extracting the ingredient CBD from the hemp plant with the help of chemicals is customary in trade. The extracted CBD was then marketed as animal feed. However, this type of production is not permitted for animal feed. Due to the lack of marketability, many CBD products have been taken from the market in the meantime. ***cdVet*** therefore did not have any CBD products in its range so far. **CBD Sticks** are not obtained with chemical additives, but they are legally compliant, purely natural, cold-pressed, and CBD-containing expeller treats. Thus the **CBD Sticks** from ***cdVet*** are marketable as a complementary feed for animals and can be fed without hesitation to animals that do not have an MDR1 gene defect.

The special ***cdVet*** cold pressing process ensures ensures a purely naturally obtained CBD expeller, which also contains the full spectrum of plant substances, consisting of terpenes, flavonoids, phenols, omega-3 and -6 fatty acids, minerals, and vitamin E. The psychoactive THC is almost completely eliminated and is of course below the limit value of 0.2% THC specified by the EU.

These tasty **CBD Sticks** have been developed as a daily food supplement for your favorite. They are not only delicious, but also provide a valuable contribution to the daily diet due to the valuable ingredients (omega 3-6-9 fatty acids, fiber, lignins, minerals, trace elements, antioxidants, vitamins (A, B_1, B_2, B_6, B_{12}, D_3, E). The natural flavors and unique taste make the food supplement a special treat for your favorite.

Dogs with MDR1 gene defect: There are no reliable studies on the tolerability of CBD products regarding dogs with MDR1 gene defect. Therefore, feeding of dogs with MDR1 gene defect should be done in consultation with your

veterinarian or veterinary practitioner. We recommend the following alternative ***cd*Vet** products for dogs with MDR1 gene defect:

- Musculoskeletal system: **ArthroGreen Classic**, **ArthroGreen plus**, et al.
- Stress: **Nerves Food**, **Calma**, et al.

Composition: linseeds*, hemp leaves*
*deoiled

Analytical constituents: CBD/CBDa (cannabidiol/-acid) 0.21%, crude protein 23.3%, crude fat 6.5%, crude fiber 10.4%, crude ash 10.4%, sodium 0.2%

Feeding recommendation: Feed 2-6 sticks a day depending on weight.
