HuminoVet Powder LW 25 kg | 25 kg

Manufacturer cdVet Agrar

Product number 199

Weight 25.001kg

Product description

Conventional manure tends to anaerobic decomposition through rottenness. By using HuminoVet Powder the rottenness with influence is promoted.

Advantages of using HuminoVet powder:

-Binding of ammonia - healthy stable air
-Composting promotion - less dung volume
-at an application in the stable, the container treatment is unnecessary
Advantages for the ground at land application of incurred dung/liquide manure:
-Enhancement of soil fertility through the formation of plant-usable trace elements such as zinc, copper, manganese, etc.
-Cost savings - much less synthetic fertilization necessary
-Neutralization overacidified soils by high content of basic silicates
-Strengthening of plants by increased defense capacity against pests
