

TurboBronchial Powder 1.5 kg | 1,5 kg

Manufacturer

Product number 290

Weight 1.5kg

Length 200mm

Width 200mm

Height 205mm

Product description

The respiratory tract is where most farms have the greatest performance reserves. Optimal respiratory condition and thus optimized respiration have a positive influence on feed conversion and intake. With optimal respiratory condition, the susceptibility to respiratory infections is low.

In nature, the animal would absorb essential oils via the fresh plants. This is hardly guaranteed in the stable keeping of ruminants, calves and pigs. The active substances contained in the essential oils are important for the condition of the respiratory tract and also for digestion. In particular, the cleaning of the respiratory tract is especially important in relation to the high germ and dust load in the stables. TurboBronchial Powder is a matter of course in performance assurance for many farms. It can be used throughout the entire fattening period.

Tailored to the different needs of the feeding method, you will find TurboBronchial Powder in different variants:

TurboBronchial (liquid - concentrate)

TurboBronchial Powder

TurboBronchial Drinking Water SG

TurboBronchial Liquid
