| **Weight** | 3kg |
| **Length** | 200mm |
| **Width** | 200mm |
| **Height** | 205mm |

## Product description

EquiGreen Organic Linseed Expeller Grist is made from carefully treated organic linseeds. It is rich in natural vitamin E and proteins (approx. 34%). In combination with valuable fiber, mucilage, and the high residual oil content due to our gentle cold pressing process, you enrich your horse's feed schedule.

Advantages of EquiGreen Organic Linseed Expeller Grist:
Gastric mucous membrane protection
Support of the intestinal mucosa - even in case of colic sensitivity!
Shiny fur and healthy skin
Regulation of the immune system - by supporting the intestinal flora
Contained proteins promote muscle building

EquiGreen Organic Linseed Expeller Grist provides important amino acids (proteins) as complementary feed, which the horse's organism CANNOT produce itself. If one of those essential amino acids is not available in sufficient quantity, the others cannot fulfil their tasks either. Thus, those amino acids belong to the 'first-limiting' ones and must be imperatively fed in sufficient quantities.

Advantages of feeding with grist:
All valuable components are preserved.
Easy feeding - pure and dry or as a mash
Mucilages are better broken down by grinding.
Longer shelf life through oil removal
Easy and complete digestion
