priVet GutFlora 50 ml | 50 ml

Manufacturer	priVet Farming®
Product number	4818
Weight	0.0505kg
Length	36mm
Width	36mm
Height	95mm

Product description

For the manufacturing of priVet GutFlora wild and spice plants are fermented together in a natural process. In the fermentation process, probiotic microorganisms multiply and produce lactic acid, antioxidants, enzymes, and vitamins. Those have an influence on the ph-value and optimize the intestinal ambience.

In a healthy gut, the balance of the intestinal flora is intact. Pathogenic bacteria thus do not find an ideal living basis and can develop only with great difficulty. Since a large part of the immune system is located in the intestine, an intact intestinal flora favors a well-functioning immune system.

When is the feeding of priVet GutFlora particularly important:
after dewormings, vaccinations, and antibiotic administrations.
in stress situations
during breeding
during moulting

promotion of feed conversion
support of the balance of the natural intestinal flora
stimulation of the natural immune system
