| **Manufacturer** | cdVet Agrar |
| **Product number** | 10146 |
| **Weight** | 10.1kg |
| **Length** | 235mm |
| **Width** | 180mm |
| **Height** | 310mm |

## Product description

Rumen activity is the basis for optimal feed intake and conversion in ruminants. Especially in high-yielding cows, feed intake and conversion may be impaired around calving. Therefore, if there are even minor signs of rumen problems, it is advisable to nutritionally promote rumen activity with PhytoStart Rumen Starter. Demand-based feeding in early lactation can ensure and promote basal feed performance.

PhytoStart Rumen Starter, a fermented plant extract from wild and aromatic herbs, intensively supports the rumen activity and thus the feed intake of ruminants.

in case of insufficient feed intake in ruminants
stimulation of feed intake in case of or after digestive disorders
promotion of the desire to eat around calving time
reduction of nutritional causes of abomasal displacement
