EquiGreen Nerves Food 900 g | 900 g

Manufacturer	EquiGreen®
Product number	546
Weight	0.9kg
Length	99mm
Width	99mm
Height	222mm

Product description

Stress is a completely normal alarm reaction of the body. In addition to many other factors, inadequate nutrition can also be a trigger for permanent stress. There are a variety of vitamins, minerals, and secondary plant substances from which anxious, restless, or easily irritable animals can benefit without experiencing the disadvantage of a negative influence on the waking state. Due to the mild recipe of EquiGreen Nerves Food, an effect can be expected only after about 8 days. This time should be taken into account when feeding, especially in upcoming situations that can negatively affect the animal's mind, such as long journeys, new environments, or unfamiliar soundscapes. So that riding is fun again Overall, EquiGreen Nerves Food can contribute to the relaxation, nervous strength and looseness of stressed and nervous horses via the combined nutrient effects. The horses become more content, less complicated to handle and can concentrate better on the work.
