

ZytoVet forte 150 g | 150 g

Ergänzungsfuttermittel zur Unterstützung des Immunsystems und des Zellstoffwechsels, besonders geeignet für ältere Tiere

Product number 48

Weight 0.179kg

Product description

Complementary feed (powder) for dogs, cats, and horses

For nutrition-related support of the immune system and cell metabolism

ZytoVet forte is a feed supplement for animals, for special support of feed intake in case of problems with the immune system, autoimmune diseases, and cell metabolism. The cell is the smallest functional unit of the body. It is responsible for the metabolism, i.e. for the degradation and transformation processes of food and oxygen intake, as well as for the rebuilding of degraded or damaged cells. If this system is damaged, a wide variety of diseases and disorders occur. Only healthy, functional cells guarantee a healthy body.

Expert tip: Optimal cell metabolism and strengthened cells are especially important for animals with autoimmune diseases and for older animals. Strengthened cells have an inhibiting effect on the development of degenerated cells, thus tumor susceptibility can be reduced.

Composition: grape pips meal, maerl, spirulina, mumijo, sea buckthorn berries, maltodextrin

Additives/kg: Technological additives: bentonite (1m558i) 287.6 g.

The total amount of bentonite must not exceed the permitted maximum level in complete feedingstuff of 20000 mg/kg of complete feedingstuff.
