MortellaroVet ProBiotic 10 L | 10 l

Manufacturer	cdVet Agrar
Product number	498
Weight	10.1kg
Length	235mm
Width	180mm
Height	310mm

Product description

Care product (liquid) for cows

Additive for cloven hoof baths based on fermented herbs

Putrefactive bacteria and other pathogens can generally be suppressed by healthy barn and skin flora. Mortellaro and other putrefaction-related problems are exacerbated by unhealthy, putrefactive barn flora. MortellaroVet ProBiotic strengthens the aerobic bacterial flora, which naturally inhibits or suppresses putrefaction. As a result, the cloven hoof bath provides the cloven hooves with an ambiance that helps reduce or prevent stress caused by poor care and hygiene.

MortellaroVet ProBiotic is produced through the natural fermentation of wild herbs, which can have a germ-suppressing effect and thus act as natural competitors to harmful microorganisms. It is non-toxic and can therefore also be used in occupied stables.

Important: Under no circumstances should you use any equipment (syringes, watering cans, sprayers, etc.) that has previously been used with chemical disinfectants. These can destroy or reduce the effectiveness of MortellaroVet ProBiotic.

Additional information

PZN DE	Designed for the reduction of rot-related hoof problems due to care and hygiene
PZN AT	Consists of fermented herbs that have a germ-suppressing effect
dangerous_ingerient	Nein
dangerous_goods	Nein
