TurboBronchial Powder 10 kg | 10 kg

Manufacturer	cdVet Agrar
Product number	294
Weight	10kg
Length	430mm
Width	200mm
Height	800mm

Product description

The respiratory tract is where most farms have the greatest performance reserves. Optimal respiratory condition and thus optimized respiration have a positive influence on feed conversion and intake. With optimal respiratory condition, the susceptibility to respiratory infections is low.

In nature, the animal would absorb essential oils via the fresh plants. This is hardly guaranteed in the stable keeping of ruminants, calves and pigs. The active substances contained in the essential oils are important for the condition of the respiratory tract and also for digestion. In particular, the cleaning of the respiratory tract is especially important in relation to the high germ and dust load in the stables. TurboBronchial Powder is a matter of course in performance assurance for many farms. It can be used throughout the entire fattening period.

Tailored to the different needs of the feeding method, you will find TurboBronchial Powder in different variants:

TurboBronchial (liquid - concentrate)
TurboBronchial Powder
TurboBronchial Drinking Water SG
TurboBronchial Liquid
