privet Bronchial Drinking Water 20 ml | 20 ml

Manufacturer	priVet Farming®
Product number	3040
Weight	0.02044kg
Length	28mm
Width	28mm
Height	77mm

Product description

Complementary feed (liquid) for pigs, poultry, and rabbits

Stimulation of feed intake in livestock sensitive to the respiratory tract

In the area of the respiratory tract, most animals have the greatest performance reserves. Optimal respiratory condition and thus optimized respiration have a positive influence on feed conversion and intake. With optimal respiratory condition, the susceptibility to respiratory infections is low.

In nature, the animal would absorb essential oils via the fresh plants. This is hardly guaranteed when pigs and poultry are kept in stables. The active substances contained in the essential oils are important for the condition of the respiratory tract and also for digestion. In particular, the cleaning of the respiratory tract is especially important in relation to the high germ and dust load in the stables. **privet TurboBronchial Drinking Water** can be used throughout the entire fattening period.

Composition: dextrose, sodium chloride

Additives/kg: Flavouring compounds: eucalyptus oil 78.4 g, thyme oil 7.0 g, camphor oil (2b130-eo) 2.8 g.

Analytical constituents: crude protein 0.0%, crude fat 0.0%, crude fiber 0.5%, crude ash 1.9%, moisture 90%, sodium 0.6%, lysine 0.0%, methionine 0.0%

Feeding recommendation: Shake well before use! 4-10 ml/100 L of drinking water (1-2 drops/L). The feeding quantity can be increased by up to 50% in special situations. such as stabling, stress, and weather changes. 1 tsp. corresponds to ca. 5 ml. 10 drops correspond to ca. 0.3 ml.

Clean the drinking water system before use! The suitability of the technical equipment for the application of **privet**

Bronchial Drinking Water is the responsibility of the user, and the use is therefore at the user's own risk!
