TurboBronchial Liquid 100 ml | 100 ml

Manufacturer	cdVet Agrar
Product number	4231
Weight	0.95kg
Length	88mm
Width	88mm
Height	230mm

Product description

PREMIXTURE (liquid) for ruminants, calves, pigs, and poultry

Stimulation of feed intake in livestock sensitive to the respiratory tract - optimal for organic farms, self-mixers and feed mixing companies

The respiratory tract is where most farms have the greatest performance reserves. Optimal respiratory condition and thus optimized respiration have a positive influence on feed conversion and intake. With optimal respiratory condition, the susceptibility to respiratory infections is low.

In nature, the animal would absorb essential oils via the fresh plants. This is hardly guaranteed in the stable keeping of ruminants, calves and pigs. The active substances contained in the essential oils are important for the condition of the respiratory tract and also for digestion. In particular, the cleaning of the respiratory tract is especially important in relation to the high germ and dust load in the stables. **TurboBronchial** is a matter of course in performance assurance for many farms. It can be used throughout the entire fattening period.

Tailored to the different needs of the feeding method, you will find **TurboBronchial** in different variants:

- **TurboBronchial** (liquid - concentrate)
- **TurboBronchial Powder**
- **TurboBronchial Liquid**
- **TurboBronchial Drinking Water SG**
- **TurboBronchial Plus**

Additional information

PZN DE	For nutritional support of respiratory condition in livestock sensitive to respiratory
PZN AT	FIBL listed - can be used on organic farms. Ideal for self-mixers, in teat buckets and feed mixing farms
dangerous_ingerient	Ja
dangerous_goods	Ja
