casaCare Compost starter 500g | 500 g

Manufacturer	
Product number	206
Weight	0.5kg
Length	98mm
Width	98mm
Height	127mm

Product description

Valuable compost is produced by aerobic (with oxygen) conversion, foul odors are caused by putrefaction (anaerobic conversion). CasaCare Compost starter helps to support massively the rotting and humification in a natural way. As a result, putrefaction is virtually eliminated and - with proper handling of casaCare Compost starter - the natural conversion processes, which make the positive characteristics of compost during fertilization. Positive effects from casaCare Compost Starter: - Fight against rotting odor - Natural humus smell - Designed for hard cases - No chemical residues - therefore, compost treated with casaCare Compost starter is also suitable in the garden for the fertilization of food plants - Optimization of the fertilization properties of compost and better nutrient availability - control of parasites due to the implementation process - Not hazardous to water - Can also be used in bio compost bin
