REPTIN MitesSpot 10 ml

Manufacturer REPTIN®

Product number 382

Weight 0.041kg

Product description

Care product for animals

Care oil for odor masking against mites

REPTIN MitesSpot is a skin-care fragrance oil based on cold-pressed, organic Egyptian black cumin oil and organic coconut oil, which masks the animal‘s own odor. The animal is no longer perceived by insects and pests as an attractive host worth infesting. The body odor of the animal is slightly affected. This odor is imperceptible to humans and animals, but unbearable to insects and pests.

• long-lasting masking properties against mites and other pests
• masks the animal‘s own odor
• contains pure plant ingredients
• excellent long-term protection
• sufficient for 1 animal for 1 season
• easy to use

Expert Tip: The application of **REPTIN MitesSpot** is recommended in the first third of the animal. Most reptiles have a kidney-portal vein circulation in which the blood from the caudal half of the body is first supplied to the kidneys. For this reason, medications and care products should never be applied to the last third of the body, caudal to the kidneys. This is to prevent secondary plant compounds from reaching the kidneys in large concentrations. It is also assumed that a large proportion of the secondary plant constituents are excreted before they are effective.

Composition: organic coconut oil, organic black cumin oil, jojoba oil, neem oil, geranium oil, lavender oil, manuka oil

Application recommendation: Over a period of 3 weeks, every 2.day, depending on the size and body weight of the animal, rub 1-3 drops in your hands and spread it on the first third of the animal. Once the basic stabilization has been achieved, one application per week is sufficient.

Contains lavender oil, citronellol, and geraniol. May produce an allergic reaction.
