Fit-BARF Prebiotic 200 g | 200 g

Manufacturer	Fit-BARF
Product number	4290
Weight	0.2kg
Length	67mm
Width	67mm
Height	119mm

Product description

Complementary feed (powder) for dogs and cats

Feeding-related support for a stable digestion

There are many factors that can disturb the intestinal health of our dogs and cats, such as stress, antibiotic administration, or even an incompatible food. Often mushy or liquid feces is the result.

Fit-BARF Prebiotic is a complemantary feed that can support the intestinal health of our dogs and cats through its special properties. Thus, the ingredients contained serve as food for the 'good' microorganisms, support their multiplication, and thus prevent the spread of pathogenic germs. Intestinal flora and digestion are stabilized.

At the same time, **Fit-BARF Prebiotic** has toxin- and water-absorbing properties, which can lead to a better fecal condition. In addition, the contained B vitamins, trace elements, and essential amino acids support intestinal health and thus the non-specific immune system.

Composition: linseed expeller, brewers' yeast cell walls (MOS)

Additives/kg: Technological additives: bentonite (1m558i) 100 g
The total amount of bentonite must not exceed the permitted maximum level in complete feedingstuff of 20000 mg/kg of complete feedingstuff.

Analytical constituents: crude protein 13.8%, crude fat 3.3%, crude fiber 3.2%, crude ash 12.0%, ash insoluble in HCl 10.0%, calcium 0.65%, phosphor 0.27%, sodium 0.05%

Feeding recommendation: Add 0.5-1 g/5 kg body weight daily to the feed as required. 1 quarter tsp. corresponds to approx. 1 g.

The simultaneous oral use with macrolides shall be avoided.
