dentaVet Fresh Breath 100 g | 100 g

Manufacturer	dentaVet
Product number	626
Weight	0.1kg
Length	67mm
Width	67mm
Height	89mm

Product description

Complementary feed for dogs

Odor adsorption by chlorophyll, powder

Hardly anything can disturb the human-animal relationship as much as an unpleasant muzzle odor. **dentaVet Fresh Breath** was developed precisely for this problem.

Arguably one of the outstanding properties of chlorophyll is its strong ability to adsorb odors. Chlorophyll can also significantly reduce the odor of bitches in heat and thus keep male dogs away. Likewise, if the dog has a strong `own scent‘, it can significantly improve the odor.

Expert tip: **dentaVet Fresh Breath** can develop its positive properties even more effectively if it is poured over with hot water or brewed as a tea before feeding.

Composition: parsley, grass, herbs, legume plants, seaweed meal, sage leaves, Chlorella

Additives/kg: Technological additives: clinoptilolite of sedimentary origin (1g568) 10 g.
Total quantity of clinoptilolite of sedimentary origin from all sources shall not exceed the maximum content of 10000 mg/kg.

Analytical constituents: crude protein 14.8%, crude fat 3.0%, crude ash 18.9%, crude fiber 10.9%, ash insoluble in HCl 10.2%

Feeding recommendation (powder): Add 2.5-3 g/10 kg body weight to the feed 2-3 x weekly. 1 tsp. corresponds to approx. 2.5 g.

Feeding recommendation (capsules): 2-3 x weekly feed dogs up to 10 kg body weight 4-8 capsules. Capsule filling quantity: ca. 0,443 g.

dentaVet Fresh Breath ist not suitable for gestating bitches.
